The

B 2

of

Fly, 1734.

Of the Eclipses this Year.

THERE will be four Eclipses this Year, two of each Luminary, of which only one of them will be visible to any Part of *Europe*. Those of the *Sun* happening in the Night, when that Glorious Body will be depressed below our Horizon, will therefore be invisible to us.

In like manner, the *Moon* will be Eclipsed the 27 of *March*. at 11 in the Morning; at which time, she will be attending our Antipodes.

So that the only visible Eclipse will be of the *Moon*, on the 22 of *September* at 36 min. after one in the Morning, when almost half the *Moon's* Body will be darkened.

The Beginning of the Four Quarters this Year.

THE *Spring* Quarter begins *March* 10th day, 54 min. after 1 Morning, when Day and Night are equal.

The *Summer* Quarter begins *June* 11 day, 10 m. past 1 in the Morning, making the longest Day to all those who inhabit on this side the Equator.

Autumn, or *Harvest* Quarter begins *September* 22 day, 14 m. after 2 in the Afternoon, again making Days and Nights equal all the World over.

Winter Quarter begins *December* 11 day, 32 min. after 5 in the Morning, making our shortest Day, but the longest to all who inhabit on the Southern side of the Equator.

Rises

Fly, 1735.

Moon is in *Aries*, *Taurus*, or *Capricorn*: and know that the aspects or the Moon with *Saturn*, or *Mars*, or the Moon in *Leo*, ought to be eschewed in the taking of Medicines. Finally, If necessity urge no haste, these Observations are expedient; for 'tis a plain truth, that the change of weather upon differing Aspects doth greatly change and alter mens Bodies.
